EXECUTIVE SUMMARY

RECOMMENDATIONS

Based on an analysis of practices among community colleges and secondary literature:

COMMUNITY COLLEGES SHOULD ENSURE THAT ALL STAKEHOLDERS ARE ABLE TO PARTICIPATE IN THE DEVELOPMENT AND IMPLEMENTATION PROCESS.

A recurring theme in the literature is the importance of a comprehensive approach towards implementing guided pathways. Feedback from early adopters indicates the importance of concerted efforts from all stakeholders at the institution, a process that may be started or deepened with conversations with staff, faculty, and students.

COMMUNITY COLLEGES SHOULD SEEK GRANTS FOR GUIDED PATHWAYS DEVELOPMENT.

A wide variety of state and national organizations are interested in guided pathways and related programming. Part of any institution’s strategy should involve identifying the relevant local funding sources.

KEY FINDINGS

Over the past decade, guided pathways have become increasingly popular at community colleges nationwide.

Efforts by the American Association of Community Colleges (AACC) and the Community College Research Center (CCRC), in particular, have led to a fast expansion of guided pathways initiatives, promoting the shift from the so-called “cafeteria style” offerings to a more structured model. The overarching goals include improved academic performance and better retention and graduation rates.

Researchers and early adopters emphasize that implementing guided pathways is beneficial despite a lengthy implementation process.

A central recommendation from researchers and institutions is the adoption of a comprehensive approach toward implementing guided pathways. Collaboration across departments and offices, leadership from all organizational levels, and data-based decisions have been identified as key parameters for a successful transformation. Further, the AACC assumes an implementation process of five years. Despite start-up challenges, institutions have reported improved academic performance of students and better retention rates.

Meta-majors, program and transfer maps, pathway entries, and strong student support services are vital components of guided pathways.

Community colleges with guided pathways have restructured their curricula along meta-majors that include clear road maps. Aligning meta-majors, individual programs, and student advising with the local labor market, general education courses, and electives has typically been a long and complex, albeit integral, process for adopters of guided pathways. Additionally, strong relationships with the local school district and four-year institutions are important for transfer pathways.

FAST FACTS

300+ Number of institutions nationwide that have adopted guided pathways

$500k Grant award that Washington community colleges have received from College Spark for the implementation of guided pathways
METHODOLOGY

To assist community colleges in developing guided pathways, Hanover Research conducted a review of current trends, best practices, and exemplary case studies of community colleges. Examined publications include guidelines, studies, and articles published by:

- American Association of Community Colleges (AACC)
- Community College Research Center (CCRC)
- UW Community College Research Initiatives (UW)
- Brookings Institute (Brookings)
- National Center for Inquiry & Improvement (NCII)
- Inside Higher Ed and Education Dive

RESEARCH QUESTIONS

What are guided pathways?

What are best practices informing the development and implementation of guided pathways?

Which are examples of community colleges that have developed and implemented guided pathways?

BENCHMARKED COMMUNITY COLLEGES WITH GUIDED PATHWAYS

TRENDS IN GUIDED PATHWAYS

GENERAL CONTEXT
Over the past decade, several community colleges have implemented guided pathways to help their students succeed.

- In recent years, a range of researchers highlighted structural and motivational issues at community colleges, such as low retention and completion rates, as well as confusion and frustration among students (CCRC; Brookings; Hechinger; Chronicle).

- The so-called “cafeteria style” of community college has been identified as a major cause of challenges as it provided students with “too many choices” but “too little guidance.”

- To provide students with clear direction and help them succeed, the American Association of Community Colleges (AACC) launched Guided Pathways in 2014. The AACC works in collaboration with the Community College Research Center (CCRC), Jobs For The Future (JFF), and other organizations.

- In Washington, Guided Pathways initiatives are supported by the State Board for Community and Technical Colleges (SBCTC) and College Spark (Guided Pathways Initiative).

BEST PRACTICES
Comprehensive reform, effective leadership, curricular alignment, and tailored advising constitute essential features of guided pathways.

- Stakeholders emphasize the importance of a comprehensive approach for implementing guided pathways. Collaboration across departments and offices, as well as “leadership from all levels of the organization” are oft-cited requirements for a successful systemic change (CCRC; NCII).

- Other essential capacities for the implementation of guided pathways include the will and ability to use data and evidence, technological tools and infrastructure, strategically targeted professional development, appropriate policy conditions, and a continuing action research agenda (AACC; UW).

- AACC structures guided pathways into three phases: Planning, Implementation, and Evaluation (AACC). In 2017, the CCRC published a tool that allows institutions to self-assess how far along they are “toward adopting essential guided pathways practices at scale” (CCRC).

- Colleges “need the best of both career pathways and guided pathways in order to truly increase economic advancement” (JFF). An integration of both approaches might be particularly beneficial within the field of career and technical education (CCRC; CLASP).
Central goals of guided pathways initiatives include facilitating students’ orientation of available programs and career opportunities, improving academic performance and retention, and reducing time-to-degree completion.

The AACC Guided Pathways Model covers four essential practices. Correspondingly, institutions have typically undergone four phases of implementation.

**Phase 1:** Laying the groundwork for whole-college redesign

**Phase 2:** Introducing guided pathways to the college community

**Phase 3:** Supporting collaborative planning and implementation

**Phase 4:** Sustaining and institutionalizing student success reforms

- **Clarify paths to student end goals**
  Includes simplification of students choices with default program maps and establishment of transfer pathways

- **Help students choose and enter a pathway**
  Includes bridge from K-12 to higher education, redesign of traditional remediation as an “on-ramp” to a program of study, and provision of accelerated remediation

- **Help students stay on path**
  Includes strong, embedded and ongoing advising, as well as academic and non-academic supports embedded throughout students’ programs

- **Ensure that students are learning**
  Includes establishment of program-level learning outcomes, integration of digital and projects, internships and other applied learning experiences, as well as effective teaching practices
### Adoption of Guided Pathways

Following the four practices suggested by the AACC, **over 300 institutions** have adopted the Guided Pathways model as of late 2019. A recent review indicates that institutions may “encounter stumbling blocks,” such as resistance from staff and faculty, resource allocations in support of the new model, and the need “to make constant tweaks to get the results they want” (*Education Dive*). Despite these challenges, early adopters have reported **positive outcomes**.

The figure below summarizes essential components of offerings and practices relevant to guided pathways, as well as notable examples.

OUTCOMES AND BENEFITS

PROMISING RESULTS

Institutions that have been able to gather longitudinal data on the impact of their guided pathways programs report improved academic performance and retention rates.

In 2018, South Puget Sound Community College saw an improvement of 14 percentage points among students who completed a college-level math class and a 10 percentage point increase of students who completed a college-level English class.

In 2019, Austin Community College reported a “15.5 percentage point increase in overall retention from one term to the next.”

Jackson College saw the share of students who earned at least six college-level credits in their first term increase from 35 percent (2015) to 58 percent (2016). At Lorain Community College, students took fewer credits that did not count toward their major.

A 2019 survey of U.S. students found that they “are finding value in the components of guided pathways.” Students stated that guided pathways helped them “select a major and its required courses.”

STRATEGIES FOR ONGOING PROGRESS

❖ Community colleges have implemented monitoring and data collection tools to keep track of students’ progress and outcomes (e.g., early momentum metrics; progress tracking; progress updates; annual reports; performance monitoring). The CCRC will conclude a long-term study on the effects in August 2020.

❖ California Community Colleges recommends data coaching to inform guided pathways development.

❖ A-B Tech and Austin Community College highlight the importance of professional development opportunities for staff and faculty.
CASE STUDY: GUIDED PATHWAYS IN WASHINGTON

CONTINUOUS EXPANSION

Washington was one of the first states in the nation to participate in large-scale implementation of guided pathways.

❖ In 2015, Pierce College District, Skagit Valley College, and South Seattle College became members of the state’s first cohort in the Guided Pathways Movement.

❖ In FY 2018 and FY 2019, the Washington legislature invested $3 million in support of Guided Pathways.

❖ The Center for Law and Social Policy (CLASP) has recently called for a stronger alignment of Washington’s Integrated Basic Education and Skills Training (I-BEST) career pathway with guided pathways.

❖ The new Washington College Grant award (2019) has been lauded for making postsecondary education “more affordable for low- and middle-income students.” The program reportedly also “invests in preparing Washington students for Washington jobs by expanding the successful Guided Pathways program.”

❖ In February 2020, the Washington Board for Community and Technical Colleges (SBCTC) stated that it seeks to double community college completion rates by 2030.

NOTABLE FEATURES

Most benchmarked WA community colleges have received a $500,000 grant from College Spark Washington. The award period is five years. In 2018, South Seattle College also received a five-year Title III award of $2.1 million from the Department of Education in support of its guided pathways efforts.

South Seattle College and South Puget Sound Community College have expanded supported services through Completion Coaches and comprehensive tutoring services. South Puget has seen a 14 percent greater likelihood of students’ continued education thanks to its Enhanced Student Success class.

Equity plays a central role in Washington’s Guided Pathways. This goal has generally received greater attention than other goals across institutions and organizations (Bragg; OCCRL; McClenny; Skagit Valley CC). Everett Community College, for example, developed a framework called 5 Dimensions of Equity.

North Seattle College has produced videos that inform about guided pathways, and South Puget Sound has embedded short video clips in available areas of study to address pathways (e.g., Healthcare).

### Participating Institutions in Washington

- Clark College
- Clover Park Technical College
- Everett Community College
- Lower Columbia Community College
- Peninsula College
- Pierce College District
- Renton Technical College
- Skagit Valley College
- South Puget Sound Community College
- South Seattle College
- Spokane Falls Community College
- Tacoma Community College
## Benchmarking Summary

### Overview of Selected Community Colleges with Guided Pathways

</table>
| Asheville-Buncombe Technical Community College, Asheville, NC | 6,892      | • Transitional Pathways  
• Pathways Project for the Associate of Arts and Associate of Science Degrees  
• JumpStart Pathways (dual enrollment) | • Total of 39 pathways (e.g., General A.A.)  
• ACA 122 College Transfer Success course | • Division of Arts & Sciences launched Pathways Project in 2016  
• Emphasizes the importance of quality advising and flexibility  
• Partnerships with Goodwill, Biltmore Company, and Biltmore Farms for Hospitality Pipeline |
| Community College of Philadelphia, Philadelphia, PA | 16,672     | • Guided Pathways  
• Adoption of Accelerated Learning Program (ALP) | • Intake Process  
• Curriculum Mapping  
• Extensive Advising and Progress Tracking  
• Micro-credentials  
• Stackable credits | • Goals include reduction of time-to-degree and avoidance of excess credits  
• First cohort member (2015)  
• 1-year lead up before any changes  
• Partners with Philadelphia public school system |
| Everett Community College, Everett, WA       | 7,957      | • Pathways  
• Program Maps | • Each pathway has team of academic advisors  
• Curriculum Guide Master List  
• IR data series  
• Customized transfer maps/ joint advising with Western Washington University (WWU) | • In 2019, College received $500,000 grant from College Spark for implementation (over five years)  
• Guided Pathways Scorecard dashboard (in Tableau, not available to public) |
| Linn-Benton Community College, Albany, OR    | 5,559      | • Guided Pathways  
• Seven Meta Majors | • Core Team | • College adopted Achieving the Dream/Destination Graduation programs in 2012 and launched Guided Pathways in 2015  
• Monitoring includes annual report on scale of adoption (e.g., 2019)  
• Meeting notes |
| North Seattle College, Seattle, WA           | 5,929      | • Seattle Pathways | • Guiding team | • Produced videos and webinars  
• Meeting minutes |
